PROFILE

Dedicated content management professional with over three years of experience optimizing digital content strategies to improve website performance and user engagement. Proficient in CMS platform management, workflow optimization, and maintaining consistent, high-quality content across digital channels. Skilled at blending content strategy with front-end development to deliver user-focused experiences that drive results.

Solid front-end development expertise in building responsive, accessible websites using HTML5, CSS3, and JavaScript (ES6+), with a strong foundation in UI/UX design principles. Experienced in WordPress, Duda CMS, Gutenberg, Elementor, and WooCommerce for site creation and customization. Currently expanding technical capabilities with React.js, React Router, Tailwind CSS, Vite, ESLint, and Axios to develop modern, dynamic web applications.

WORK EXPERIENCE

2022 - PRESENT

eClerx Philippines Inc.

Analyst - Website Designer

In managing digital content, I carefully analyze user needs and platform limitations to create strategies that ensure engaging, high-quality content across all channels. By streamlining workflows and leveraging CMS tools, I deliver consistent, user-friendly digital experiences that align with brand goals and drive audience engagement.
